Odoo complete setup step by step

1. Create an Odoo Account

➢ Go to the official Odoo website: https://www.odoo.com

➢ Click on Start Now or Sign Up.

➢ Create a company account by filling in:

- Company Name

- Your Email Address

- Password

- Phone (optional)

➢ Verify your email address if required.

Note: Step one is optional if you are not required then you can download odoo for a better option.

2. Download Odoo

➢ **There are two ways to get Odoo:**

(a) Download from Official Website

➢ Visit: https://www.odoo.com/page/download

➢ First you can create:

Your Company	
Your Name	
Phone Number	+92
Your Email	
Primary Interest	Use it in my company
Company size	less than 5 employees

ⓘ We will handle your personal data as described in our Privacy Policy.

➢ Choose your version (latest stable version is recommended).
➢ Click the Download button given in the image below.

Odoo 19

		Community	Enterprise
⊞	Windows	Download	Download
◌ • ◎	Ubuntu • Debian	Download	Download
🐱	RPM	Download	Download
▤	Sources	Download	Download

Odoo 18

		Community	Enterprise
⊞	Windows	Download	Download

(b) Download from GitHub (Source Code)

- Visit: https://github.com/odoo/odoo

- Choose your Odoo version branch (e.g.,odoo 18 or 19).

- Click Code → Download ZIP or clone with Git.

Note: Option (a) is the best you can go to the odoo official website and download the odoo.

3. Install Required Dependencies:

➢ Open the downloader folder and select the download **(.exe)** file and right click then **Run as administrator.**
➢ Select a language given in the image below.
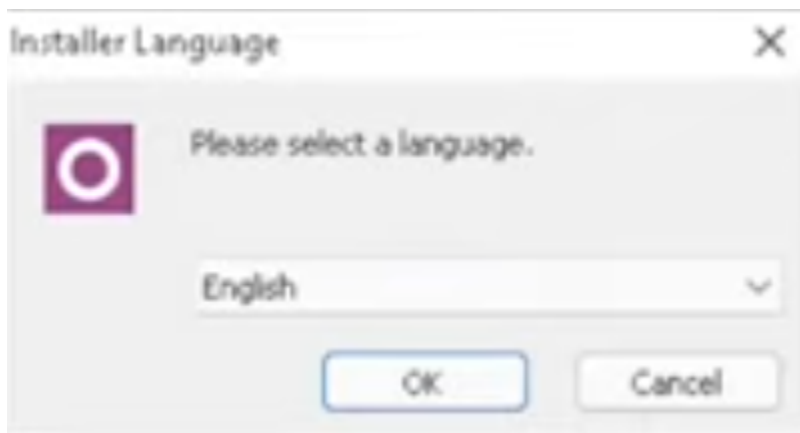

➢ Press a Next button to starting a odoo installation and accept the license agreement
➢ After accepting the agreement, make sure to select the installation type as **Odoo Server and PostgreSQL Server** given in the image below.
➢ After completing the above step, you can set the **username and password** according to your choice, as shown in the second image below.
➢ Select a by default location and click **instal**l button.
